**WEERSTANDSBESTUUR:**
**Movento**® is 'n groepkode **23** insekdoder. Enige populasie van 'n spesifieke insek mag individue insluit wat 'n natuurlike weerstand teen **Movento**® of enige ander groepkode **23** insekdoder het. Indien hierdie insekdoders herhaaldelik aangewend word kan die weerstandbiedende individue uiteindelik die insekpopulasie oorheers. Hierdie weerstandbiedende insekte sal waarskynlik nie deur **Movento**® of enige ander groepkode **23** insekdoder beheer word nie.

Om weerstand teen insekdoders te vertraag:

- Vermy die eksklusiewe herhaaldelike gebruik van insekdoders in dieselfde insekdoder groepkode. Wissel af met produkte in verskillende insekdoder groepkodes.
- Integreer ander beheermaatreëls (chemies, verbouing, biologies) in insekbeheer programme.

**Vir spesifieke inligting oor weerstandsbestuur kontak die registrasiehouer van hierdie produk.**

**GEBRUIKSAANWYSINGS:** GEBRUIK SLEGS SOOS AANGEDUI.

**TOEDIENING:**
**Groentegewasse:** Toediening moet **slegs** met grond spuittoerusting gedoen word. Deeglike bedekking van die teiken area is noodsaaklik. Dien toe in voldoende water - pas die water volumes aan volgens die groeistadium van die gewas. Voeg altyd 'n *__byvoegmiddel__ (soos **Ballista**) volgens die vervaardiger se etiket aanbeveling by.

**VERENIGBAARHEID:**
**Sitrus: Movento**® is verenigbaar met ligte tot medium nou-spektrum minerale olie vir gebruik op sitrus. Verwys na die onderskeie ligte tot medium nou-spektrum minerale olie etikette vir aanwysings rakende die toediening van hierdie middels.

**Wyn- en Tafeldruiwe: Movento**® is verenigbaar met **Ballista**® (Reg. Nr. L7442), **Decis**® **Forte** (Reg. Nr. L6563), **Flint**® **Max** (Reg. Nr. L8827), **Luna**® **Experience** (Reg. Nr. **Koolgroentes, Kool blaargroentes, Blaargroentes, Eiervrug, Soetrissies (Paprika en brandrissies), Pampoengewasse en Blaarslaai: Movento®** is INTERNASIONAAL op 'n wyse verskeidenheid groente gewasse getoets sowel as LOKAAL op kool en pampoen. **Aangesien Movento® nie op alle lokale kultivars en in tenk mengsels met ander produkte getoets is nie, is dit raadsaam om eers vir gewasveiligheid te toets deur Movento® oor 'n klein oppervlakte te spuit. Dit is ook raadsaam om Movento nie in 'n mengsel met enige ander produk op hierdie groentegewasse te spuit nie.**

**MENGINSTRUKSIES:**
Maak die spuittenk halfvol met water en giet dan die verlangde volume **Movento®** in die tenk. Vul aan met water terwyl geroer word. **RESISTANCE MANAGEMENT:**
For resistance management, **Movento**® is a group code **23** insecticide. Any insect population may contain individuals naturally resistant to **Movento**® and other group code **23** insecticides. The resistant individuals can eventually dominate the insect population if these insecticides are used repeatedly. These resistant insects may not be controlled by **Movento**® or any other group code **23** insecticides.

To delay insecticide resistance:

- Avoid exclusive repeated use of insecticides from the same insecticide group code. Alternate with products from different insecticide group codes.
- Integrate other control methods (chemical, cultural, biological) into insect control programs.

**For specific information on resistance management contact the registration holder of this product.**

**DIRECTIONS FOR USE:** USE ONLY AS DIRECTED.
